Welcome

SPIE/COS Photonics Asia showcases the power of photonics technologies and applications. Photonics and optical science and engineering are becoming increasingly important as society gradually moves from electron-based to photon-based technologies and industries. Specifically, photonics is becoming increasingly important in health care and medicine, nanotechnologies, environment and energy, manufacturing, information systems and communications, displays, defense and aerospace, entertainment and multimedia, energy and green lighting, etc. China is the fastest growing market for the global optics and photonics industries.

Since 2001, SPIE/COS Photonics Asia has been the must-attend event for the global photonics community who need to keep current with what is happening in the Asian optics and photonics industries, and for developing new partnerships and new markets within and around China. Many Asian countries are investing heavily to transition from microelectronics-dominated to photonics-based industries. Asian economies are becoming more and more important to the health of the global economy in the 21st century, and Asian Photonics markets are rapidly expanding. SPIE/COS Photonics Asia 2016 will provide a unique forum for the reporting and review of new developments in photonics and optoelectronics ranging from material and devices to advanced systems and applications. Cutting-edge technologies, applications, product announcements and demonstrations, market analysis and investment opportunities will be discussed in various conference sections and product exhibitions. SPIE/COS Photonics Asia includes a plenary session with visionary speakers, parallel technical sessions, a social banquet, and an interactive poster session/reception.

We extend our sincere greetings to you, and hope that your experience at SPIE/COS Photonics Asia 2016 is a very exciting and rewarding experience.

Freeform Optics Opening up a Bright Future for Imaging Instrumentation

Jannick Rolland

R.E. Hopkins Ctr. for Optical Design and Engineering (USA), NSF/IUCRC Ctr. for Freeform Optics (USA), and The Institute of Optics, Univ. of Rochester (USA)

Abstract: Freeform surfaces in optical system design have already transformed the lighting industry and have started to revolutionize the imaging industry following recent advances that empower innovation in optical instrumentation. In the context of imaging, an historical highlight about freeform optics will be followed with a discussion of key concepts and discoveries in optical aberration theory that are currently guiding the design of freeform imaging systems for manufacturing with nanometer-class accuracy. Freeform manufacturing, enabled by maturing techniques that include polishing, ion beam finishing, diamond machining, milling, and magnetorheological finishing, will be discussed. Building on simultaneous theoretical as well as rapid technical advances across industries from design to assembly, three design case studies will be discussed to highlight the emerging benefits of freeform optics in imaging systems as well as the design for manufacture process. With the emergence of high definition displays and sensors, together with the constant quest for more compact and higher performance optical imaging technologies across a wide range of applications, freeform optics opens the path for a rich space of solutions that will enable the science of tomorrow.

Biography: **Jannick Rolland** is the Brian J. Thompson Professor of Optical Engineering at the Institute of Optics at the University of Rochester and Director of the NSF I/UICRC Center for Freeform Optics (CeFO). She also directs of the R.E. Hopkins Center for Optical Design and Engineering and the ODALab that synergize with CeFO. Passionate about translating inventions out of the research laboratory to benefit society, she co-founded LighTopTech Corp., a startup focused on advanced optical metrology, where she serves as Chief Technology Officer. She earned an Optical Engineering Diploma from the Institut D'Optique Théorique et Appliquée in France and an MS and PhD in Optical Science from the University of Arizona. Professor Rolland is a Fellow of OSA, SPIE, and NYSTAR, and she served on the Editorial Board of Presence (MIT Press) (1996-2006) as well as Associate Editor of Optical Engineering (1999-2004) and IEEE publications (2007-2016). She was a Director at Large on the OSA Board of Directors (2010-2013) and currently serves as Topical Editor of Optics Letters. She is the recipient of the 2014 David Richardson Medal.

Innovative Large Wide field Astronomical Telescope: LAMOST

Xiangqun Cui

Nanjing Institute of Astronomical Optics and Technology/ National Astronomical Observatory, Chinese Academy of Sciences (China)

Abstract: LAMOST, Large Sky Area Multi-Object Fiber Spectroscopic Telescope, is one of the most innovative telescope configurations in the world with the both wide field-of-view and the large aperture, four-thousand optical fibers, and sixteen spectrographs equipped. LAMOST has the capability to observe and capture tens of millions of spectra of celestial objects such as stellar, galaxies, and quasars.

Biography: **Cui Xiangqun** is an academician of the Chinese Academy of Sciences, and also an academician of the Third World Academy of Science, the 12th president of Chinese Astronomical Society, the former director of NIAOT. She got her MSC and PhD in Purple Mountain Observatory, CAS in China. During the years of 1985 to 1986 she visited and worked in Jodrell Bank Observatory in England for radio telescopes, and from 1986 to 1994 she worked in European Southern Observatory (ESO) in Germany for the VLT project, which is a 4×8.2 meter telescope array located at the Chile Paranal. From 1994 to the present she has worked for Large Sky Area Multi-Object Fiber Spectroscopic Telescope (LAMOST), for which she successfully led LAMOST project to be built, which is one of the most innovative telescope configurations in the world. Cui resolved a series of the technical challenge problems in LAMOST especially in active optics: This effort not only helped realize the innovative conceptualization of the LAMOST project, but also helped initiate new progress in active optics and large optical telescopes. Quantum Dot Photonics: From Science to Practical Implementation

Yasuhiko Arakawa

Institute of Industrial Science, The Univ. of Tokyo (Japan) and Institute for Nano Quantum Information Electronics, The Univ. of Tokyo (Japan)

Abstract: Recent advances in growth and physics of quantum dots have led to the commercialization of quantum dot lasers for telecommunications and other applications. Moreover, single quantum dots coupled to photonic crystal nanocavities have enabled the investigation of fundamental physics such as solid-state cavity quantum electrodynamics (QED). In this presentation, we discuss the current state of the art of quantum dot lasers, and also future prospects including their application to hybrid silicon photonics and the development of ultra-small nanolasers. We also describe the demonstration of a single photon emission from a III-Nitride nanowire-based quantum dot operating above room temperature.

Biography: **Yasuhiko Arakawa** received his BE, ME, and PhD degree in Electronics and Electrical Engineering from the University of Tokyo in 1975, 1977 and 1980, respectively. In 1980, he joined the University of Tokyo as an assistant professor and became a full professor in 1993. He is currently the director of Research Center for Photonics Electronics Convergence, Institute of Industrial Science and the director of Institute for Nano Quantum Information Electronics, the University of Tokyo. He served as a member of Science Council of Japan (2008-2014), a project leader of FIRST Program (2011-2014), and the President of International Commission of Optics (ICO) (2014-2017). He has been awarded Fellows of IEEE, OSA, JSAP, and IEICE. His major research fields include physics, growth, and photonics applications of the quantum dot. In 2015, he contributed to various activities of International Year of Light and Light-based Technology (IYL2015). SPIE EVENT POLICIES

Acceptance of Policies and Registration Conditions

The following Policies and Conditions apply to all SPIE Events. As a condition of registration, you will be required to acknowledge and accept the SPIE Registration Policies and Conditions contained herein.

Granting Attendee Registration and Admission

SPIE, or their officially designated event management, in their sole discretion, reserves the right to accept or decline an individual's registration for an event. Further, SPIE, or event management, reserves the right to prohibit entry or remove any individual whether registered or not, be they attendees, exhibitors, representatives, or vendors, who in their sole opinion are not, or whose conduct is not, in keeping with the character and purpose of the event. Without limiting the foregoing, SPIE and event management reserve the right to remove or refuse entry to any attendee, exhibitor, representative, or vendor who has registered or gained access under false pretenses, provided false information, or for any other reason whatsoever that they deem is cause under the circumstances.

SPIE Safe Meeting and Misconduct Policy

SPIE is a professional, not-for-profit society committed to providing valuable and safe conference and exhibition experiences. SPIE is dedicated to equal opportunity and treatment for all its members, meeting attendees, staff, and contractors. Attendees are expected to be respectful to other attendees, SPIE staff, and contractors. Harassment and other misconduct will not be tolerated; violators will be addressed promptly and seriously. Consequences up to and including expulsion from the event as appropriate will be implemented immediately.

The SPIE anti-harassment policy can be found at <http://spie.org/policy>.

Reporting of Unethical or Inappropriate Behavior

SPIE is an organization with strong values of responsibility and integrity. Our Harassment Policy, Ethics Statement, and Code of Professional Conduct contain general guidelines for behavior and for conducting business with the highest standards of ethics.

Onsite at a SPIE meeting, contact any SPIE Staff member with concerns or questions for thorough follow-up. If you feel in immediate danger, please dial 911 for police intervention.

SPIE has established a confidential reporting system for staff and all meetings participants to raise concerns about possible unethical or inappropriate behavior within our community. Complaints may be filed by phone at +1-888-818-6898 or at www.SPIE.ethicspoint.com and, if preferred, may be made anonymously.

Identification

To verify registered participants and provide a measure of security, SPIE will ask attendees to present a government-issued Photo ID at registration to collect registration materials.

Individuals are not allowed to pick up badges for attendees other than themselves. Further, attendees may not have some other person participate in their place at any conference-related activity. Such other individuals will be required to register on their own behalf to participate.

Capture and Use of a Person's Image

By registering for an SPIE event, I grant full permission to SPIE to capture, store, use, and/or reproduce my image or likeness by any audio and/or visual recording technique (including electronic/digital photographs or videos), and create derivative works of these images and recordings in any SPIE media now known or later developed, for any legitimate SPIE marketing or promotional purpose.

By registering for an SPIE event, I waive any right to inspect or approve the use of the images or recordings or of any written copy. I also waive any right to royalties or other compensation arising from or related to the use of the images, recordings, or materials. By registering, I release, defend, indemnify and hold harmless SPIE from and against any claims, damages or liability arising from or related to the use of the images, recordings or materials, including but not limited to claims of defamation, invasion of privacy, or rights of publicity or copyright infringement, or any misuse, distortion, blurring, alteration, optical illusion or use in composite form that may occur or be produced in taking, processing, reduction or production of the finished product, its publication or distribution.

Payment Method

Registrants for paid elements of the event, who do not provide a method of payment, will not be able to complete their registration. Individuals with incomplete registrations will not be able to attend the conference until payment has been made. SPIE accepts VISA, MasterCard, American Express, Discover, Diner's Club, checks and wire transfers. Onsite registrations can also pay with Cash.

Authors/Coauthors

By submitting an abstract, you agree to the following conditions:

- An author or coauthor (including keynote, invited, and solicited speakers) will register at the author registration rate, attend the meeting, and make the presentation as scheduled.
- A manuscript (minimum 6 pages, maximum 20 pages) for any accepted oral, invited, keynote, or poster presentation will be submitted for publication in the *Proceedings of SPIE* in the SPIE Digital Library. Some SPIE events have other requirements that the author is made aware of at the time of submission.
- Only papers presented at the conference and received according to publication guidelines and timelines will be published in the *Proceedings of SPIE* in the SPIE Digital Library (or via the requirements of that event).

Audio, Video, Digital Recording Policy

Conferences, courses, and poster sessions: For copyright reasons, recordings of any kind are prohibited without prior written consent of the presenter or instructor. Attendees may not capture or use the materials presented in any meeting/course room or in course notes on display without written permission. Consent forms are available at Speaker Check-In. Individuals not complying with this policy will be asked to leave a given session and/or asked to surrender their recording media.

EXHIBITION HALL: For security and courtesy reasons, recordings of any kind are prohibited unless one has explicit permission from on-site company representatives. Individuals not complying with this policy will be asked to surrender their recording media and to leave the exhibition hall.

Your registration signifies your agreement to be photographed or videotaped by SPIE in the course of normal business. Such photos and video may be used in SPIE marketing materials or other SPIE promotional items.

SPIE EVENT POLICIES

Laser Pointer Safety Information/Policy

SPIE supplies tested and safety-approved laser pointers for all conference meeting rooms. For safety reasons, SPIE requests that presenters use provided laser pointers.

Use of a personal laser pointer represents user's acceptance of liability for use of a non-SPIE-supplied laser pointer. If you choose to use your own laser pointer, it must be tested to ensure <5 mW power output. Laser pointers in Class II and IIIa (<5mW) are eye safe if power output is correct, but output must be verified because manufacturer labeling may not match actual output. Come to Speaker Check-In and test your laser pointer on our power meter. You are required to sign a waiver releasing SPIE of any liability for use of potentially non-safe, personal laser pointers. Misuse of any laser pointer can lead to eye damage.

Access to Technical and Networking Events

Persons under the age of 18 including babies, carried or in strollers, and toddlers are not allowed in technical or networking events. Anyone 18 or older must register as an attendee. All technical and networking events require a valid conference badge for admission.

Underage Persons on Exhibition Floor Policy

For safety and insurance reasons:

- No persons under the age of 18 will be allowed in the exhibition area during move-in and move-out.
- Children 14 and older, accompanied by an adult, will be allowed in the exhibition area during open exhibition hours only.
- All children younger than 14, including babies in strollers and toddlers, are not allowed in the exhibition area at any time.

Unauthorized Solicitation Policy

Unauthorized solicitation in the Exhibition Hall is prohibited. Any non-exhibiting manufacturer or supplier observed to be distributing information or soliciting business in the aisles, or in another company's booth, will be asked to leave immediately.

Unsecured Items Policy

Personal belongings should not be left unattended in meeting rooms or public areas. Unattended items are subject to removal by security. SPIE is not responsible for items left unattended.

Wireless Internet Service Policy

At SPIE events where wireless is included with your registration, SPIE provides wireless access for attendees during the conference and exhibition but cannot guarantee full coverage in all locations, all of the time. Please be respectful of your time and usage so that all attendees are able to access the internet.

Excessive usage (e.g., streaming video, gaming, multiple devices) reduces bandwidth and increases cost for all attendees. No routers may be attached to the network. Properly secure your computer before accessing the public wireless network. Failure to do so may allow unauthorized access to your laptop as well as potentially introduce viruses to your computer and/or presentation. SPIE is not responsible for computer viruses or other computer damage.

Mobile Phones and Related Devices Policy

Mobile phones, tablets, laptops, pagers, and any similar electronic devices should be silenced during conference sessions. Please exit the conference room before answering or beginning a phone conversation.

Smoking

For the health and consideration of all attendees, smoking, including e-cigarettes, is not permitted at any event elements, such as but not limited to: plenaries, conferences, workshops, courses, poster sessions, hosted meal functions, receptions, and in the exhibit hall. Most facilities also prohibit smoking and e-cigarettes in all or specific areas. Attendees should obey any signs preventing or authorizing smoking in specified locations.

Hold Harmless

Attendee agrees to release and hold harmless SPIE from any and all claims, demands, and causes of action arising out of or relating to your participation in the event you are registering to participate in and use of any associated facilities or hotels.

Event Cancellation

If for some unforeseen reason SPIE should have to cancel the event, registration fees processed will be refunded to registrants. Registrants will be responsible for cancellation of travel arrangements or housing reservations and the applicable fees.
